

# OUTDOOR SCHOOL AT JOHN HANCOCK STATION (John Day NM), 2001

Drive along Columbia River towards John Hancock Station.

Stop at Shaniko on the way to John Hancock Station.

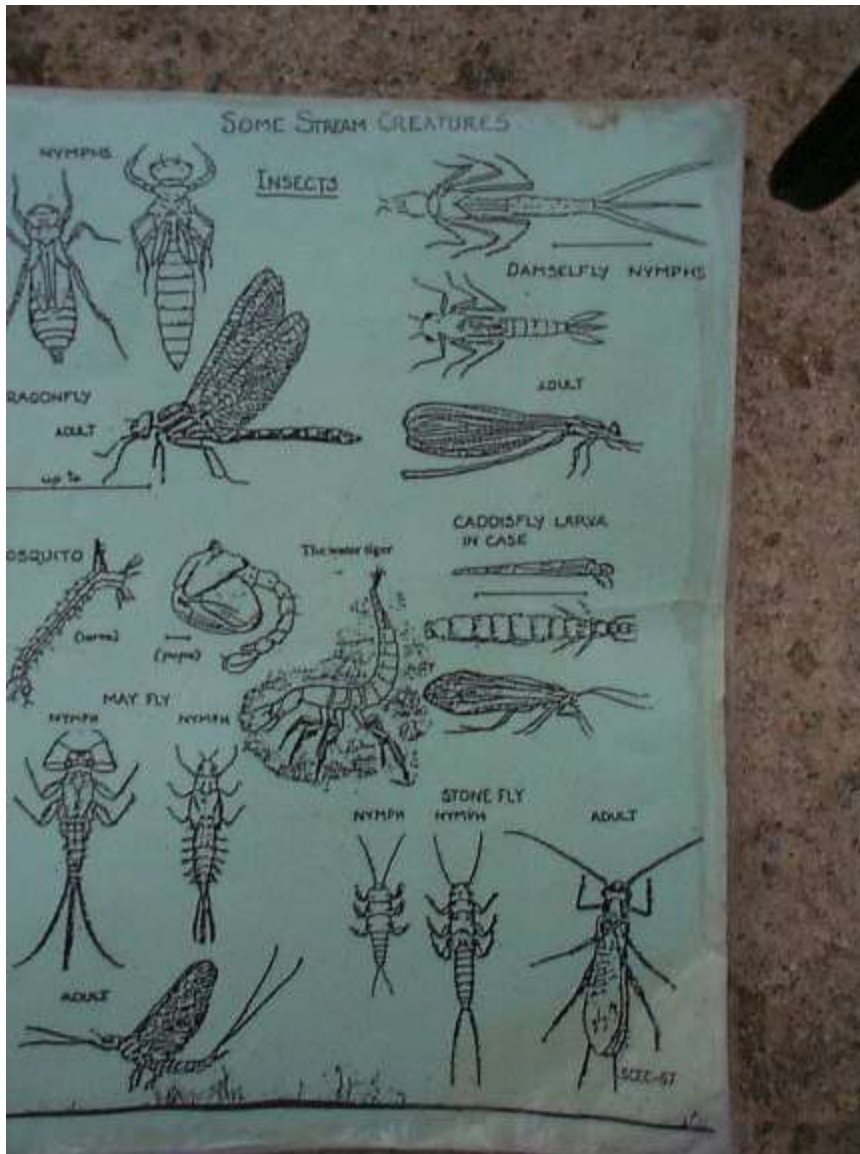

1. Monday, April 23, 2001 --

Introduction to Camp Hancock by OMSI leader, Julia King

2. OMSI instructor Erin catches her first gopher snake and holds it up for students to see.

3. Chart of some stream creatures

4. Aquatic Study: students (Susana & Alyssa A.) test ph of the pond water.

5. Aquatic Study: students capture invertebrates with small fish nets at the stock ponds.

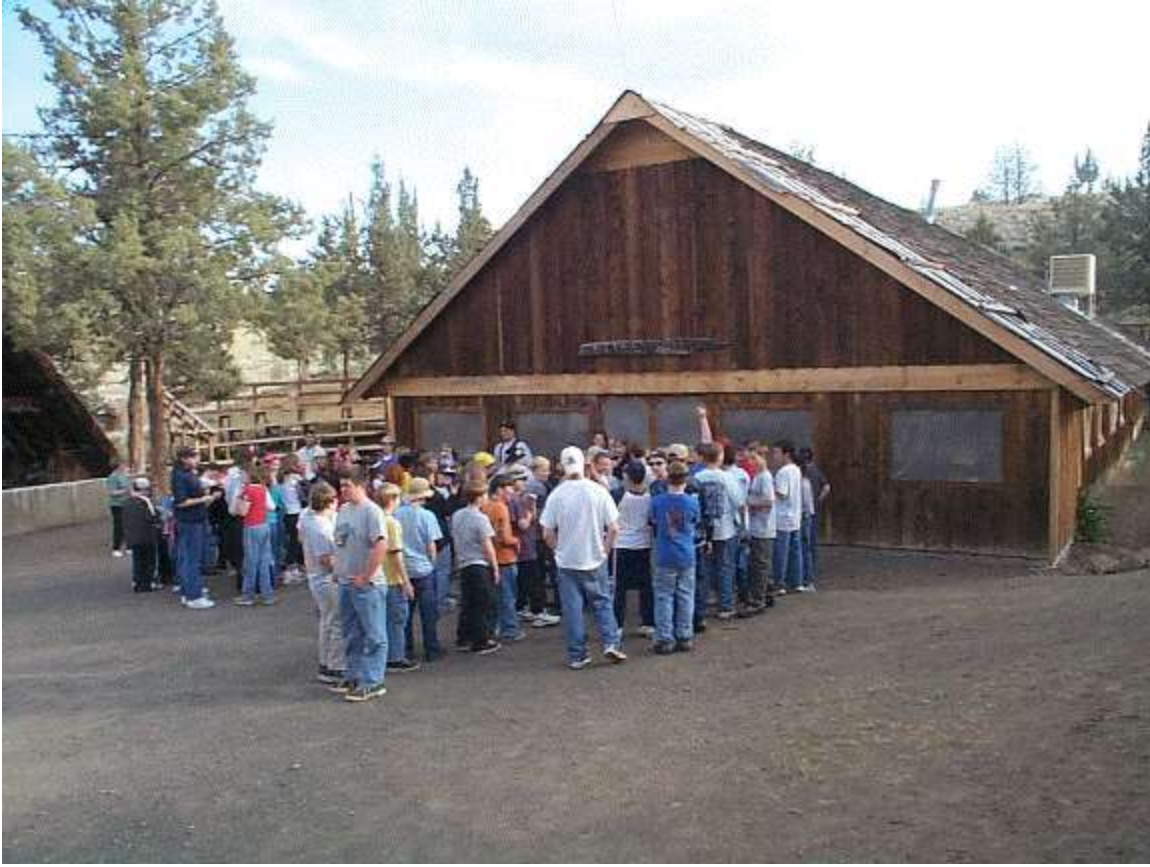

6. Aquatic Study: a captured tree frog tries to escape from the liter bowl.

7. Back to Camp Hancock, western end of camp.

8. Geology group (Melissa, Lauren, Anna L., RayAnna) with their plaster cast fossils (standing in front of Mr. Ed, the horse skeleton).

9. Lining up for dinner at Berrie Hall.

10. Taking down the flag as the evening shadows descend on the students first day at camp.

11. OMSI instructor John teaching his group the principles of geology.

12. Bones of a cow found alongside a trail.

13. Lunch time in the field -- Arid Lands / Geology group with instructor John

14. Student (Kaila) doing a field study experiment (stuff found in small roped area).

15. Student (Courtney) with a unique find on the trail. It was a bighorn sheep's horn.

16. View of Camp Hancock for a hill (looking southward).
